The image features a large, semi-transparent circular graphic on the left side, which serves as a frame for three distinct scenes. The top scene shows two men in blue work shirts and white hard hats smiling. The middle scene is a city skyline at dusk, with tall buildings and their lights reflected in a body of water. The bottom scene shows a large industrial ship docked at a pier, with several large white storage tanks in the background. The text 'BUSINESS OVERVIEW' is positioned to the right of the circular graphic.

*BUSINESS
OVERVIEW*

OUR BUSINESS

01.

LPG BUSINESS

WP Energy is a leading LPG (Liquefied Petroleum Gas) distributor under the brand "Worldgas", with commitment to delivering integrated innovative services. For over 40 years, we have supplied LPG gas to customers across Thailand with technology support from SHV Group, a leading global distributor of off-grid energy from Europe, with ever-advancing management system and diverse range of workforce and experts at all levels.

02.

ENERGY & SERVICES SOLUTIONS

WP Energy has constantly developed and enhanced a range of service innovations to offer ease and convenience of total solution that meets all business partner's needs. We leverage new technology to enhance operational and management efficiency, with improved speed and quality to ensure our services truly satisfy our customer's needs.

03.

OTHER BUSINESS

In addition to energy related businesses, WP Energy is constantly exploring other new opportunities by leveraging our experience and extensive business network to support the expansion beyond the realm of energy. With high level of investment readiness, WP Energy openly embraces new business venture in innovation technology as well as other emerging businesses in line with global trends.

OUR BUSINESS

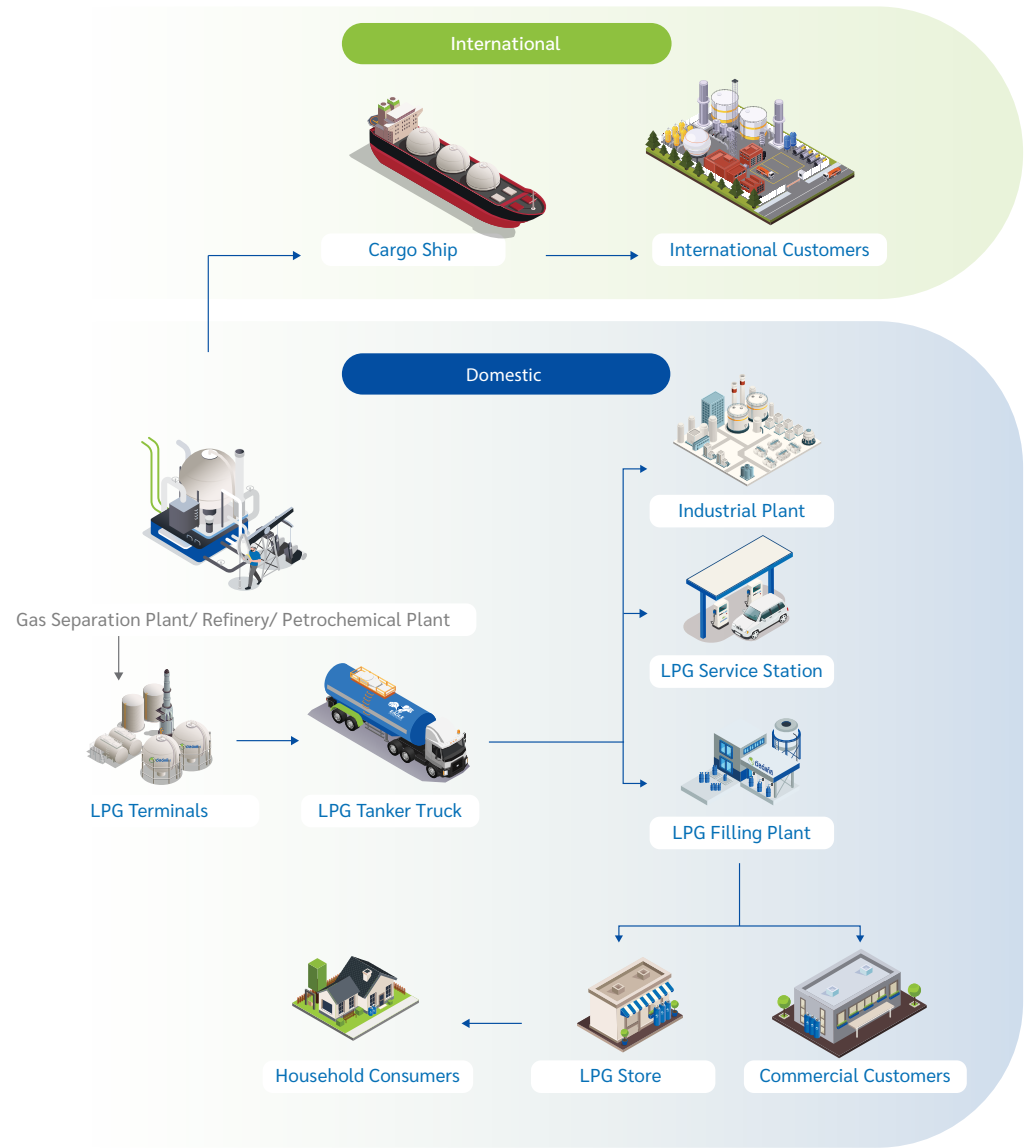

LPG BUSINESS

With the experience of over 40 years. WP Energy, the leading provider of liquefied petroleum gas under "Worldgas" trademark, One of the largest LPG in Thailand with ranking no. 2nd in LPG Market

NATURE OF BUSINESS

Driven by the concept of 'Positive Progress' based on our belief in positive thinking, we deliver clean energy solutions assessable to all with integrated services from upstream to downstream based on highest safety quality. We strive to become a leader in comprehensive energy, overcome challenges, and open up to new opportunities in order to drive business forward, at both regional and global levels, in a sustainable way.

NETWORK & DISTRIBUTION

LPG TERMINALS

WP Energy operates 5 large-scale LPG terminals in the strategic locations of each region nationwide with a total storage capacity of 18,341 tons, comprising 2 marine terminals and 3 land-based terminals, enabling our ability to store LPG in different grades and quality to serve specific customer requirements and facilitating the exports to the ASEAN region.

With adherence to utmost safety standard in every stage of operation, our LPG terminals are certified by the ISO 9001, ISO 14001 and ISO45001 standards, guaranteeing quality, occupational health and safety and environmental management systems.

CUSTOMER SECTORS AND DISTRIBUTION CHANNELS

WP Energy is a leader in comprehensive energy and a leading LPG distributor under the brand “Worldgas”, supplying a wide range of LPG products to customers across household, automobile and industrial sectors both domestically and internationally through various distribution channels.

DOMESTIC DISTRIBUTION CHANNEL

HOUSEHOLD SECTOR

WP Energy distributes LPG products to customers through gas filling plants and representative gas shops nationwide, holding 2nd position in the household sector of Thailand.

Our key strength is an extensive network of gas filling plants in strategic locations across the country, making us well-positioned to leverage our expertise in delivering clean energy solutions to customers nationwide. With our long experience in business, we are able to offer all kinds of advice to customers, including the matters related to safety inspection according to the law and arrangement of LPG safety training for customers.

- LPG Filling Plant -

- LPG Store -

With over 6 million cooking gas cylinders under the brand “Worldgas” used in the household throughout all regions of Thailand distributed through a network of more than 400 gas shops nationwide, our cooking gas cylinders are available in 5 sizes - 4, 8, 13.5, 15 and 48 kg, to meet different customer needs. All Worldgas cylinder are certified with the Ministry of Industry’s TIS No. 27-2543 standard, ensuring that they meet industry safety requirements. In fact, cooking gas with the trademark “Worldgas” is well-known and widely-recognized among consumers in the household sector.

INDUSTRIAL & COMMERCIAL CUSTOMERS

LPG is widely used in various industrial production processes as fuel that gives higher heating value and provides safe, clean, and complete combustion without causing any environmental pollution. WP Energy has been trusted by over 150 industrial customers such as ceramic sanitary ware producers and industries that use heat energy to manufacture their products at a constant temperature.

Today, WP Energy has been trusted by over 1,000 renowned commercial customers. Our commercial customers consist primarily of small factories, hotels, hospitals, restaurants, shopping centers, and community malls.

Our proficient sales and engineering teams are ready to provide customers with consultation on gas distribution equipment, both with single and dual-phase cylinder valve, and system safety to ensure that customers can optimize gas consumption with a maximum level of safety, as well as after-sales services.

Moreover, WP Energy also offers specialized LPG cylinder for forklift truck that is economical and safe in accordance with the standards set by the Ministry of Industry, which is widely recognized by many renowned companies.

AUTO GAS STATION

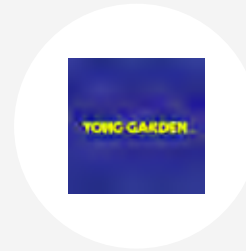

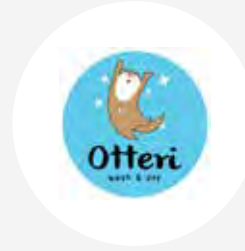

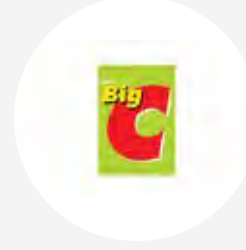

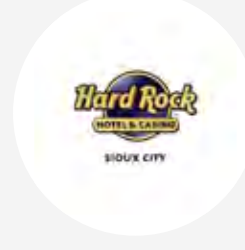

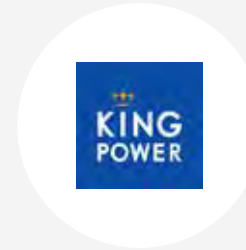

WP Energy ensure motorists' peace of mind on their every-day journey with extensive network of Worldgas branded LPG service stations that sell LPG to LPG-powered vehicles in over 300 locations nationwide covering various needs of customers.

INTERNATIONAL DISTRIBUTION CHANNEL

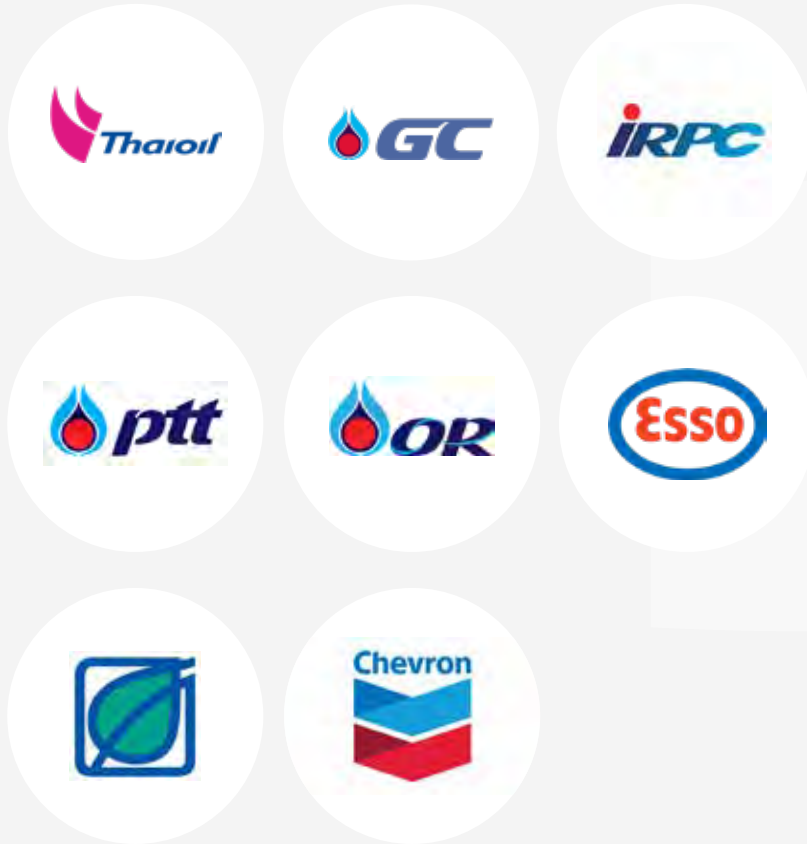

WP Energy exports gas products as a trading company to support regional economic growth, starting with Vietnam as the first market outside Thailand. We continue to explore new exporting opportunities to other markets in the ASEAN region.

Our valued customers

Supplier

WP Energy sources high-quality LPG the nation's leading gas separation plants.

OUR BUSINESS

ENERGY & SERVICE SOLUTION

WP Energy continues to develop and enhance service innovation to achieve strategic, process and operational excellence in order to create business solutions and to determine the breakeven point in business and meet the customer's needs.

WP SERVICE SOLUTION

WP Energy has teams of experts to serve customers as consultant for energy use in various forms with a wide range of services covering all business sectors, as well as investment consulting services.

SOLAR SERVICE SOLUTION (SOLAR ROOFTOP)

By partnering with EPC, a leading provider of solar power with over twenty years of experience in supplying solar solutions to leading companies, WP Energy is keen to serve businesses looking into immediate and long-term electricity savings from installation of solar panels.

Solar rooftop is recognized worldwide for its ability to reduce electricity expenses. Solar panels can efficiently generate power and reduce electricity costs from the first month after commercial operation date (COD). The installation of rooftop Solar PV on factory roofs is recognized worldwide for its low maintenance costs and has been proven that it will not affect the factory's power usage and production capacity. Businesses can immediately save electricity bill and achieve better cost efficiency.

WP MAINTENANCE SERVICE

With a team of experienced engineers, WP Energy is well-positioned to provide helpful advice for customers on the design of gas station according to the principles of engineering and pursuant to regulatory requirements, as well as comprehensive gas distribution station installation services including the installation of tank system and gas distribution system, the safety audit, the improvement and repair and maintenance of gas distribution system and the repair and maintenance of PM vaporizer.

LOGISTIC SERVICE

WP Energy utilizes state-of-the-art LPG transportation and transportation system that meets standards operated by its affiliates, Eagle Intertrans Co., Ltd. and Premier Carrier Co., Ltd., both registered carriers under Section 12 of the Fuel Trade Act, B.E. 2543. Delivery service is fully equipped with online GPS tracking system, allowing customers to have a full view of their delivery status.

WP Energy also has a comprehensive service to provide freight services to the country's leading modern trade group.

SOCIAL AND ENVIRONMENTAL RESPONSIBILITY POLICY

As “We Promise” you, WP Energy wishes to continue helping Thai society in accordance with our vision to stay “Together, Create Smile” for Thai people through activities in all 4 areas in order to improve the quality of life and encourage good economy, society and environment in a sustainable way.

1. Improving the quality of life for Thai people both in matters of daily life and career from help generating more income and creating more jobs for people in the community to providing full support for food industry and professionals in the industry in Thailand.
2. Putting focus on art and culture which are the roots of Thais. Food and fashion, especially, are the roots that lead to how WP Energy organized “the World Curated by WP Energy”
3. Preserving the environment in a sustainable way both in terms of energy and conservation of

natural resource. With the “WP Energy Walk Rally” activity held annually.

4. Giving full support to children through the “Full Belly... Warm Smile with World Gas” activity with Worldgas which the company has done for 9 consecutive years to offer a good quality of life to children living around the company’s gas storage warehouse.

WP Energy is committed to supporting the WP Volunteer Program to contribute to community development and solve problems faced in each locality. Our focus areas are cultivating the spirit of generosity, sharing, helping hands to public service for better society, community and the country without expecting anything in return.

STANDARD & CERTIFICATES

WP Energy is committed to continue developing our various management systems in terms of quality, environment, occupational health and safety. We have been certified by international standards such as is committed to continue developing our various management systems in terms of quality, environment, occupational health and safety. We have been certified by international standards such as
